

1. $2 + 2 = 4$ and 4 divided by 2 is 2
2. Laws of Motion:
 - a. First Rule: An object will remain at rest or in a uniform state of motion unless that state is changed by an external force.
 - b. Second Rule: Force is equal to the change in momentum (mass times velocity) over time. In other words, the rate of change is directly proportional to the amount of force applied.
 - c. Third Rule: For every action in nature there is an equal and opposite reaction.
3. George Washington was the first president of the United States.
